

How To Get Rid Of Quicken Error OL-293-A ?

Quicken Error OL-293-A is a finance related error which usually occurs when quicken does not receive the expected response from the financial institution's server while updating account information.

You might be able to successfully sign in to bank's website but still receive the quicken error. The possible causes could be a temporary server issue, incorrect activation of online services or out dated/ incorrect password credentials.

The easiest way to try is by updating your account. However if you still face [Quicken Error OL-293-A](#) then follow the below listed steps for a resolution-

The image features a yellow background with a white curved shape on the left. Inside the white shape is the Quicken Customer Support logo (a red circle with a white head icon) and the text "quicken Customer Support". Below the logo, the text "RESOLVE QUICKEN ERROR OL-293-A WHEN USING QUICKEN ONLINE SERVICES" is written in a mix of red and black serif fonts. At the bottom of the white shape is a red banner with the URL "https://www.quickensupporthelpline.com" in white. To the right of the white shape is a laptop displaying a Quicken "Account Details" window. The window has a large red triangle with a white exclamation mark in the center, indicating an error. The window title is "Account Details" and it has tabs for "General", "Online Services", and "Display Options". The "Online Services" tab is active, showing options like "Online bill payment" and "Pay your bills online with Banking Direct".

- **Make sure your Quicken is updated**

First of all you need to open Quicken on your desktop/ laptop.

After that, go to 'Help' menu and then click on 'Check for updates'

If the software is not updated then you will be notified on your home screen and will be asked to install the latest release.

Then click on 'Yes' in order to start the installation process.

After that you will be required to refresh your account. If the problem persists then you can try the following alternative method to fix your [quicken error code OL-293-A](#).

- **Verify your account services**

Go to tools and then click on account list

Then you can go ahead and edit the account details that you would like to verify

Under the account details section, you need to check whether information given in account setting for quicken matches with the services provided by the bank. Many any required chances if it fails to match.

In the end, try again to connect your bank account.

● **Verify your quicken password**

There is a high possibility that secret key vault in quicken might be overlooked. For that follow the below points-

Go to the instruments menu and then select one step update.

After that you will see some boxes on your screen. You need to uncheck all the options eliminating the financial institution that has this error code.

Once it is done, click on the key icon.

Now you need to add your password.

Finally, click on 'update now'

● **Refresh your online account information**

Firstly, go to the record from the record bar.

From that point, click on the rigging icon from the highest point of the record register present.

Click on 'Update Now'

During refreshing, it will ask you to enter your password. Post that, click on "Update Now"

Look out for the on-screen directions to finish the update.

Quicken Error OL-293-A can come up due to various reasons but you don't have to worry about it as it can easily be fixed.
